

INFRARED BODY THERMOMETER

32 sets of memories

Sound alarm

Easy to use

Infrared measurement

Rapid temperature measurement: 0.5–2 secs
Measuring distance: 1-15 cm
Body temperature range: 32°C ~ 42.4°C
Measurement accuracy: $\pm 0.3^{\circ}\text{C}$
Operating environment temperature: 10°C ~ 40°C
Storage temperature: -20°C ~ 55°C
Storage humidity: $\leq 85\%$
LCD Display: high brightness backlight
Auto power off: 90 seconds
Power: DC 9V battery
Battery Alert: battery low alert
Size: 13,7 x 5,3 x 18,5 cm
Weight: 167g (with battery)

INFRARED BODY THERMOMETER

- 1) Contact-less test: high-precision infrared sensors for stable and reliable performance.
- 2) Measured values are automatically saved: 32 sets of memory of measurement data can be stored for easy analysis and comparison.
- 3) Large-sized LCD screen, high brightness backlight, clear and soft display.
- 4) Automatic shutdown saves energy.
- 5) Clean and hygienic: non-contact temperature measurement (no contact with human skin to prevent cross infection).
- 6) Simple and practical: one-button measurement, one-button memory check, easy operation.
